

ACKNOWLEDGMENTS

This report was funded through a cooperative agreement between the National Park Service and the University of Washington. The project coordinator was Tonnie Maniero, National Park Service Air Resources Division. The authors thank Ms. Maniero and staff with the ARD in Denver, Colorado, for providing data and pertinent information on the parks and constructive comments at various stages in the project. Resource managers and librarians in the parks were very helpful in reviewing park activities related to air pollution studies and in providing existing data and comments on the draft report. The principal park contacts were Jeff Connor and Craig Axtell (ROMO); Mason Reid and Bob Schiller (GRTE); Mary Hektner and Stu Coleman (YELL); Bill Michels, Lindy Key, and Jack Potter (GLAC); Roger Andrascik (THRO); Ross Rice (WICA); and Bruce Bessken (BADL). Dr. Kathy Tonnessen was instrumental in providing data, facilitating contacts, and providing comments on drafts of the report. Dee Morse coordinated preparation and revisions of the visibility sections of the report.

We are indebted to a large number of scientists and agency officials throughout the region for sharing databases and information on work in progress and for providing comments on draft materials. In particular, we wish to thank J. Baron, T. Blett, D. Campbell, E. Compaso, T. Dotts, S. Fullerton, D. Harmon, J. Ray, J. Sueker, R. Thomas, J. Turk, and M. Williams.

The following E&S employees provided support for the project: Jayne Charles and Jennifer Davis, word processing; Susan Binder, preparation of figures; and Kellie Vaché, Joseph Bischoff, and Joseph Bernert, data analysis.
