

Disease	Rabies
Primary Wildlife Affected	All mammals are susceptible; in NPS units, bats, fox, raccoon, skunk, and coyote are the primary species
Distribution	Worldwide, with a few exceptions (see map)
NPS Management	Reducing human-wildlife and pet-wildlife contact through public education. Use of NEPA as the decision-making tool to determine NPS cooperation in oral rabies vaccination efforts.
Links	CDC Rabies , WHO Rabies Map
Zoonotic Disease?	Yes, usually via bite from an infected animal
