This figure is an overview of compiled digital geologic data. It is not a substitute for site-specific investigations.

Minor inaccuracies may exist regarding the location of geologic features relative to other geologic or geographic features on the figure. Based on the source map scale (1:100,000) and U.S. National Map Accuracy Standards, geologic features represented here are within 51 meters /167 feet (horizontally) of their true locations.

This figure was prepared as part of the NPS Geologic Resources Inventory. The source maps used in creation of the digital geologic data product were:
Trusdell, F. A., Wolfe, E. W., and Morris, J. 2006. Digital Database of the Geologic Map of the Island of Hawai'i (scale 1:100,000). USGS Data Series 144.
