Park Science is resource management bulletin of the U.S. National Park Service that reports recent and ongoing natural and social science research, its implications for park planning and management, and its application to resource management. Published by the Natural Resource Information Division of the Natural Resource Program Center, it appears twice annually. Thematic issues that explore a topic in depth are published occasionally. Content is reviewed for usefulness, basic scientific soundness, clarity, completeness, and policy considerations, but does not undergo anonymous peer review.

Letters that address the scientific content or factual nature of an article are welcome; they may be edited for length, clarity, and tone.

Mention of trade names or commercial products does not constitute endorsement or recommendation for use by the National Park Service.

Articles, comments, address changes, and inquiries should be directed to the editor by email; hard copy materials should be forwarded to the editorial office address.

Park Science is also published on-line (ISSN 1090-9966). All back issues, article submission guidelines, and other useful information can be viewed and downloaded from www.nature.nps.gov/parksci.

Park Science accepts subscription donations from non-NPS readers to help defray production costs. A typical donation is \$10 per subscription per year. Checks should be made payable to the National Park Service and sent to the editorial office address.
