Park Science is a resource management bulletin of the U.S. National Park Service that reports recent and ongoing natural and social science research, its implications for park planning and management, and its application to resource management. Published by the Natural Resource Program Center, Office of Education and Outreach, it appears twice annually. Thematic issues that explore a topic in depth are published occasionally. Content is reviewed for usefulness, basic scientific soundness, clarity, completeness, and policy considerations, but does not undergo anonymous peer review.

Letters that address the scientific content or factual nature of an article are welcome; they may be edited for length, clarity, and tone.

Facts and views expressed in *Park Science* are the responsibility of the authors and do not necessarily reflect opinions or policies of the National Park Service. Mention of trade names or commercial products does not constitute endorsement by the National Park Service.

Unattributed articles in the News and Views, Information Crossfile, Highlights, and other departments are written, compiled, or edited by *Park Science* editorial staff, often based on cited sources or other material that is prepared by subject-matter experts among our readers.

Articles, comments, address changes, and inquiries should be directed to the editor by e-mail; hard copy materials should be forwarded to the editorial office.

Park Science is also published online (ISSN 1090-9966). All back issues, article submission guidelines, and other useful information can be accessed from www.nature.nps.gov/parksci.

Park Science accepts subscription donations from non-NPS readers to help defray production costs. A typical donation is \$10 per subscription per year. Checks should be made payable to the National Park Service and sent to the editorial office address.
