CORRECTION

In the article by Erik Beever regarding persistence and apparent extirpation of pika populations in and around the Great Basin that appeared in the spring 2002 printed edition, *Park Science* 21(2):23–29, the original figure 2 contained 24 data points that were assigned the wrong symbols and thus misclassified. This revised figure presents a more accurate picture of persistence and extirpation of pika populations in the region over time.
