

Park Units with Highest Number of Endangered Species—2010

Below are the eleven National Park Service units that have the highest number of endangered species in 2010. Parks in the Southeast Region are shaded in yellow and parks in the Pacific West Region are shaded in green. Endangered Species Act (ESA) categories include endangered (E), experimental (EXPN), threatened (T), and threatened by similarity of appearance (SAT). Candidate species, delisted species, delisted/monitored, and proposed endangered species are not included in this tally.
