This journal details all aspects of our global geoheritage, both in situ and portable. It examines conservation of sites and materials--use, protection and practical heritage management--as well as its interpretation through education, training and tourism. The journal covers all aspects of geoheritage and its protection. Key topics include:

- Identification, characterization, quantification and management of geoheritage
- Integration of biodiversity and geodiversity in nature conservation and land-use policies
- Geological heritage, sustainable development, community action, practical initiatives and tourism
- Geoparks: creation, management and outputs
- Conservation in the natural world, Man-made and natural impacts, climate change;
- Geotourism definitions, methodologies, and case studies
- Pedagogical use of geological heritage: publications, teaching media, trails, centers, on-site museums.
