Lava Flow Series Map

NPS Boundary

Infrastructure

- visitor center
- cities
- rivers
- roads

Volcanic Point Feature

- vent

Volcanic Flows

- Baby Capulin
- Fourth Series
- Third Series
- Second Series
- Boca
- Main Cone
- First Series
- Mud Hill

This map was produced by Kari Lanphier and Georgia Hybels (Colorado State University) in September 2015. It is an overview of compiled geologic data prepared as part of the NPS Geologic Resources Inventory. This map is not a substitute for site-specific investigations.

The source map used in creation of the digital geologic data was:

Richman, R. 2010. Digital volcanic geology of Capulin Volcano National Monument and vicinity (scale 1:24,000). Prepared by Student Conservation Association (SCA) geology and interpretation intern for Capulin Volcano National Monument, Capulin, New Mexico.

As per source map scale and U.S. National Map Accuracy Standards, geologic features represented here are within 12 m (40 ft) of their true location.

All digital geologic data and publications prepared as part of the Geologic Resources Inventory are available at the NPS Integrated Resource Management Applications Portal (IRMA): <https://irma.nps.gov/App/Reference/Search>. Enter "GRI" as the search text and select a park from the unit list.
