

Plate 2. Cross section through Hot Springs National Park and surrounding area. Cross section location is delineated on figure 4. Pre-erosional expression of some anticlines are included as translucent features. Cretaceous (green) units are not to scale, but added to illustrate the intrusive relationship with the Paleozoic bedrock. Quaternary units were not included. Graphic by Trista L. Thornberry-Ehrlich (Colorado State University) after cross section A-A' from Johnson and Hanson (2011).
